Analyze Bay Area Bike Share Data

REVIEW

HISTORY

Meets Specifications

congratulations ! 👍👍👍

You did an awesome work and everything is correctly ! 🙌

Cheers

Examine Pre-Existing BABS Visualizations

At least two questions are listed that can be answered with data.

All the questions are perfectly valid that can be answered with appropriate data. Good job coming with those!

A thoughtful and thorough examination of at least two visualizations are provided.

At least one question from Q1 is attempted to be answered, or a logical explanation is provided as to why the question cannot be answered with the visualizations provided.

well done examining the visualizations, sharing your insights and attempting to answer the above mentioned questions.

Conduct Your Own Analysis

Data wrangling was performed correctly, resulting in the code being correctly printed & correct count message displayed.

The correct trip duration and number of trips are listed.

Perfect ! Correctly answer and code !

Two visualizations are created and insights clearly and coherently described.

Great visualizations, well explained

One scenario where techniques of data science could be used was described, along with a potential application within that field.

Great Scenario !
